- WooCommerce Subscriptions Webhook Callback for Canceling subscriptions through Paymill-Dashboard currently doesn't work.

Installation manual

General Settings

Installation of Paymill Plugin in WordPress is quite easy and could be done without reading this manual. If there are any installation issues or problems while using the plugin, the following manual should clear out some questions.

1. Unzip the plugin archive.
2. Upload the directory „paymill“ to the plugin directory of WordPress.
3. Activate the plugin „Paymill“ in WordPress Adminpanel on „Plugins“ tab.
4. Submit personal API keys and API endpoint address.

5. You can setup here which Payment Options are presented in payment form. Because of Paymill security guidelines, it's not possible to automatically retrieve these informations. Please take care to only check those methods which are available in your Paymill account.

WooCommerce

1. Activate Paymill Payment WooCommerce -> Settings -> Payment Gateways -> Paymill

That's all. The payment gateway is now available in WooCommerce and ready to use. Subscriptions are supported within WooCCommerce, requires official WooCommerce "Subscriptions"-Addon.

Pay Button

The Pay Button is a simple, independent feature which allows product sales without overloading features. Please note that we can not compete with full eCommerce Solutions. You may extend the Pay Button with own custom features. Additionally, you may consider hiring the plugin author if there is a demand for a customization.

1. You may start with the common settings in WordPress ACP -> Paymill -> Pay Button. You can toggle the settings with a click on „Toggle View“.

The screenshot shows the 'PAYMILL' settings interface. On the left, the 'Pay Button' tab is active, displaying 'Common Settings'. These settings include fields for 'Number Format: Decimal Point', 'Number Format: Thousands Separator', 'Outgoing Email', 'Incoming Email', 'Thank You URL', and 'Hide Fields' (with checkboxes for Shipping, Company Name, Forename, Surname, Street, Number, ZIP, City, Email, and Phone). There is also a checkbox for 'Do not load default CSS'. On the right, a preview of the 'Pay Button' is shown. It displays 'Tesprodukt 1' with a price of '4,97 EUR' and a delivery time of 'njjsh'. Below this, the 'Total Price: 4,97 EUR' is shown. The 'Address' section has an 'Email' field. The 'Payment' section shows logos for American Express, ELV, Mastercard, and Visa, with buttons for 'Credit Card' and 'Debit Payment'. Below these are fields for 'Name', 'Credit Card Number', 'Expire Date', and 'CVC', followed by a 'Pay now' button.

2. You can setup unlimited products. Please note that only those products will be listed in widget which have a title set. The products list starts with 5 slots and extends after you've set and saved the last product title in that list. Pay Button supports subscription feature in Paymill. Subscriptions must be set in Paymill-Dashboard to make them available within Product Settings of Pay Button.

The screenshot shows the 'PAYMILL' settings interface, specifically the 'Products' tab. It displays a list of products for the Pay Button. The first product is 'Tesprodukt 1' with a price of '4,97 EUR'. The settings for this product include 'Product #1', 'Description', 'VAT', 'Subscription Offer' (with a checkbox for 'Optional: Select Subscription Plan'), 'Price', 'Hide Quantity' (with a checkbox), and 'Delivery Time' (set to 'njjsh'). The interface also includes a 'Toggle View' button and a 'Products' section header.

- To allow different shipping pricings, you are able to add unlimited shipping destinations.

General

Pay Button

Common Settings

The Paymill Pay Button is a simple, independent payment solution.

Configure common settings

[Toggle View](#)

Products

Configure products for the Pay Button. This list has a dynamic length and extends for 5 extra slots when last slot is filled and saved.

[Toggle View](#)

Shipping

Set delivery countries and shipping costs. This list has a dynamic length and extends for 5 extra slots when last slot is filled and saved.

[Toggle View](#)

Shipping Country #1	<input type="text"/>	Name of the available delivery country, e.g. "England"
Shipping Costs	<input type="text"/>	Gross fee for the flat shipping costs., e.g. "7" or "4.90"
Shipping VAT	<input type="text"/>	Value-Added-Tax Rate in % for the flat shipping costs., e.g. "19" or "7"
Shipping Country #2	<input type="text"/>	Name of the available delivery country, e.g. "England"
Shipping Costs	<input type="text"/>	Gross fee for the flat shipping costs., e.g. "7" or "4.90"
Shipping VAT	<input type="text"/>	Value-Added-Tax Rate in % for the flat shipping costs., e.g. "19" or "7"

- Activate the widget by moving it to your sidebar. Please note that you'll not be able to load more than one Paymill form on the same page.
- You may customize the widget via CSS. All HTML elements have appropriate CSS classes and IDs.

Main Sidebar

Appears on posts and pages except the optional Front Page template, which has its own widget

Search

Shopplugin

1. Copy the directory “shopp” from /copy_this/ in paymill plugin-directory via FTP into “wp-content/plugins” of WordPress. Paymill will appear as payment gateway within shopplugin admin control panel.

Magic Members

1. Copy the directory “magicmembers” from /copy_this/ in paymill plugin-directory via FTP into “wp-content/plugins” of WordPress. Paymill will appear as payment gateway within Magic Members admin control panel.
2. Currently, user-subscriptions are supported only, post-purchase will be added within the next updates.
3. Please note that Magic Members currently has beta status. This means that it may contain errors and is not stable enough for live environments. Nevertheless, your beta testing and feedback is highly appreciated.

Troubleshooting

If not done yet, the TEST API Keys should be replaced with LIVE API Keys within Paymill admin panel of WordPress.

If you get an error while paying with specific payment methods, please make sure this method is available in your Paymill-Account.

Subscriptions are currently supported for: WooCommerce, Pay Button

Translation

The plugins uses translation feature of WordPress. The language files can be found at `paymill/lib/translate/`
